About me

I am a proactive and detail-oriented professional, eager to keep learning and contribute with innovative technological solutions. I am particularly drawn to neuroscience and motivated by learning new languages to gain new perspectives.

Personal Skills

Proactive, Responsibility, Empathy
Adaptable, Resilience, Ability to listen, Curiosity, Meticulous, Teamwork.

Education

Programming Technician 2016 – 2019

High school with a technical degree, CBTis no. 121

Computer Systems Engineer 2019 - 2024

Instituto Tecnológico de San Luis Potosí

Technical Skills

Programmig Languages	C#, C/C++, Python, Java, Java Script, HTML, CSS
DBMS	MySQL, PostgreSQL, HeidiSQL, SQLite
Other Technologies	WPF, Netbeans, Laravel, Laragon, Node.js Vue, Figma
Methodologies	SCRUM, Double Diamond

Languages

- **Spanish:** Native
- **English:** Intermediate

Work Experience

Daikin 2023 – 2024, Hybrid UI/UX Intern

Enthusiastic and detail-oriented UI/UX Trainee focused on user-centered design. I contributed to developing a new user-centric version of an application and delivered projects from scratch that improved workflow efficiency by 25% and achieved 90% scores in SUS and PSSUQ usability tests. My work included creating user personas and building functional prototypes in Figma, resulting in a system where users no longer needed support to manage the application.

Publications

User-Centered Design and Usability Testing of an Air Handling Unit testing application..... Nov, 2024
DOI: <https://doi.org/10.47756/aihc.y9i1.144>

Projects

- [Power Gym: Management System..... ↗](#)
Designed a comprehensive gym management platform to replace manual paper-based workflows. Conducted on-site field research to identify operational bottlenecks, resulting in a 90% reduction in member check-in time and a 100% improvement in data availability by eliminating 42 minutes of daily manual transcription.
- [Digital Diploma Repository \(CRUD App\) ↗](#)
Developed a centralized digital repository to replace outdated paper-based storage for teacher diplomas, enhancing data security and accessibility. This system reduced retrieval time by over 95% and increased filing efficiency by 80%.
- [Azure Logic App & Cognitive Services ↗](#)
Architected and deployed an automated cloud workflow using Azure Logic Apps to perform real-time social listening and data processing.

Certificates

- [Microsoft Certified: Azure Fundamentals](#)
- [Fortinet Certified Associate Cybersecurity](#)
- [Cybersecurity Essentials](#)
- [CCNA: Enterprise Networking, Security, and Automation](#)

Interests & Activities

- Passionate about Reading
- Enjoy artistic activities, especially drawing
